PHASE I ENVIRONMENTAL SITE ASSESSMENT PARCEL IDS: 051-99-0014-701 & 051-99-0003-000 TAYLOR, MICHIGAN 48180

AKT PEERLESS PROJECT No. 6278F-1-17

1.0 <u>INTRODUCTION</u>

The Downriver Community Conference Brownfield Consortium (the Client and User) retained AKT Peerless Environmental & Energy Services (AKT Peerless) to conduct a Phase I Environmental Site Assessment (ESA) of Parcel Nos. 051-99-0014-701 & 051-99-0003-000 in Taylor, Wayne County, Michigan (subject property). This Phase I ESA was conducted in accordance with (1) the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries [(AAI), 40 CFR Part 312] and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process / Designation E 1527-05 (ASTM Standard Practice E 1527-05).

1.1 PURPOSE

The purpose of this Phase I ESA was to evaluate the current and historical conditions of the subject property in an effort to identify recognized environmental conditions (RECs)¹ and historical recognized environmental conditions (HRECs)² in connection with the subject property. Moreover, certain users of this Phase I ESA may be able to satisfy one of the environmental due diligence requirements to qualify for the bona fide prospective purchaser, contiguous landowner, or innocent landowner liability protections available under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, the Superfund Amendments and Reauthorization Act (SARA) of 1986, and the Small Business Liability and Brownfield Revitalization Act (Brownfield Amendments) of 2002. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs and HRECs in connection with the subject property.

1.2 SCOPE OF SERVICES

AKT Peerless' scope-of-services is based on its proposal PF-10120, dated August 6, 2009, and the terms and conditions of that agreement. This Phase I ESA included the following:

¹ ASTM's Standard Practice E 1527-05 defines the term recognized environmental condition (REC) as the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate (1) an existing release, (2) a past release, or (3) a material threat of a release of a hazardous substance or petroleum product into structures on the subject property or into the ground, groundwater, or surface water of the subject property.

² ASTM defines the term historical recognized environmental condition (HREC) as an environmental condition which in the past would have been considered an REC, but which may or may not be considered an REC currently. Neither HRECs nor RECs are intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- an inquiry of environmental conditions by an environmental professional.
- a review of specialized knowledge reported by the Client.
- a review of public and historical records, including those maintained by federal, state, tribal, and local government agencies.
- interviews with regulatory officials and personnel associated or knowledgeable with the subject property, including as appropriate past and present owners, or neighbors if the property is abandoned.
- a reconnaissance of the subject property and adjoining properties.

1.3 PROJECT RESOURCES

AKT Peerless referred to the following resources between August 6, 2009, and September 1, 2009, to complete its ESA:

- United States Environmental Protection Agency (USEPA), Region 5
- United States Geological Survey (USGS)
- United States Department of Agriculture (USDA) Soil Conservation Service
- Michigan Department of Environmental Quality (MDEQ)
- Wayne County Environmental Health Department
- Taylor Government Sources (e.g., assessing, building, fire, engineering departments, etc.)
- Environmental Data Resources, Inc. (EDR)
- Bresser's City Directory Library
- Interviews and Questionnaire Responses

1.4 SIGNIFICANT ASSUMPTIONS

During this Phase I ESA, AKT Peerless made the following significant assumptions:

- AKT Peerless assumed that the information provided by EDR in the regulatory database report is an accurate and complete representative summary of the information contained in the referenced regulatory agency records, except when such information is obviously contradicted by other data.
- AKT Peerless assumed that the information used to prepare this assessment that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives, or other secondary sources was an accurate and complete representative summary of the information possessed by those individuals, representatives, or sources.

1.5 LIMITATIONS AND EXCEPTIONS

A list of general limitations and exceptions typically encountered when completing Phase I ESAs is provided in Appendix A. Along with the inherent limitations set forth in various sections of ASTM Standard Practice E 1527-05 and the USEPA All Appropriate Inquiry Standard, the accuracy and completeness of this report may also be limited by the following project specific facts or conditions:

• Visual observations of the subject property were limited by the presence of dense vegetation growing throughout the property.

Subject to the general limitations and exceptions listed in Appendix A and the referenced terms and conditions, AKT Peerless accepts responsibility for the competent performance of its duties in executing this assignment and preparing this report in accordance with the normal standards of the profession, but disclaims any responsibility for consequential damages.

Should additional information become available to the Client that differs significantly from our understanding of conditions presented in this report, AKT Peerless requests that such information be forwarded immediately to our attention so that we may reassess the conclusions provided herein and amend this project's scope of services as necessary and appropriate.

1.6 SPECIAL TERMS AND CONDITIONS

To the best of AKT Peerless' knowledge, no special terms or conditions apply to the preparation of this Phase I ESA.

1.7 USER RELIANCE

AKT Peerless performed this Phase I ESA for the benefit of the Client and the City of Taylor (a User). AKT Peerless acknowledges that these parties may rely on the contents and conclusions presented in this report. Unless stated otherwise in writing, AKT Peerless makes no other warranty, representation, or extension of reliance upon the findings of this report to any other entity or third party.

2.0 <u>USER AND/OR CLIENT PROVIDED INFORMATION</u>

AKT Peerless submitted a questionnaire to the City of Taylor (User) requesting information about the subject property and this Phase I ESA. Ms. Linda Keacher, Development Services Supervisor, completed the questionnaire on behalf of the City of Taylor. The following subsections summarize the information Ms. Keacher provided to AKT Peerless.

2.1 TITLE RECORDS

The Client did not provide recorded land title records to AKT Peerless.

2.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The Client did not report any: (1) environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law; or (2) activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls, that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law.

2.3 KNOWLEDGE OF THE USER

The Client did not report specialized knowledge or experience, actual knowledge, or commonly known or reasonable ascertainable information that is material to identifying recognized

environmental conditions in connection with the subject property.

2.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The Client did not report knowledge of, or reason to anticipate, a reduction in the value of the subject property for environmental issues.

2.5 REASON FOR PERFORMING THIS PHASE I ESA

According to the Client, this Phase I ESA was conducted as part of environmental due diligence related to marketing the land for redevelopment.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located in the southwest ¼ of Section 19 in Taylor (T.3S./R.10E.), Wayne County, Michigan. The subject property is situated north of Northline Road and east of Inkster Road. It consists of one rectangular parcel and one irregularly-shaped parcel that contain approximately 41.82 acres combined. The City of Taylor is the current owner and manager of the subject property which is currently unoccupied. The subject property's parcel identification numbers are 051-99-0014-701 and 051-99-0003-000.

For ease of reference in this report, AKT Peerless has designated each of the subject property parcels with a letter. These designations have no relevance to legally recorded data about the subject property.

Parcel	Address	Tax Identification Number	Owner of Record	Approximate Acreage
Α	none	051-99-0014-701	City of Taylor	32.67 acres
В	none	051-99-0003-000	City of Taylor	9.15 acres

Refer to Figure 1, Subject Property Location Map; Figure 2, Topographic Location Map; Figure 3, Parcel Map; and Figure 4, Subject Property Map. The legal descriptions of the two parcels of the subject property are presented in Appendix B. Photographs taken during AKT Peerless' subject property reconnaissance are provided in Appendix C.

3.2 SUBJECT PROPERTY AND VICINITY CHARACTERISTICS

The subject property is currently unimproved vacant land and is located in an area of Taylor that is characterized by undeveloped, commercial, residential, and light industrial properties, and surface roadways.

3.3 DESCRIPTION OF STRUCTURES AND OTHER IMPROVEMENTS

There are no structures or other non-structural improvements currently on the subject property.

3.4 CURRENT USE OF THE SUBJECT PROPERTY

The subject property is not currently used for any significant or obvious purpose. Parcel A of the subject property is zoned TRO for Technology, Research, and Office usage. Parcel B of the subject property is zoned R-1B for a Single Family Residential Dwelling. Past uses of the subject property are discussed in Section 4.5.

3.5 UTILITIES AND MUNICIPAL SERVICES

AKT Peerless identified the type and supplier of utilities provided to the subject property. These services are described in the following table.

Utility / Service	Туре	Utility Company or Municipality	Comments/Historical Services
heat	natural gas available	DTE Energy	none identified
municipal waste	general refuse	not applicable	none identified
potable water	municipal available	City of Taylor	none identified
electricity	electric lines	DTE Energy	none identified
sewage disposal	municipal available	City of Taylor	none identified
storm water	county	Wayne County	none identified

Additional information regarding the referenced heat, water, and sewage utilities is presented in Section 4.4.

3.6 CURRENT USES OF THE ADJOINING PROPERTIES

The following table describes the current uses of the adjoining properties, identified occupants, and noteworthy observations of environmental concern, if any, that were noted during AKT Peerless' recent reconnaissance of the adjoining properties.

Direction	Address	Current Use / Occupant	Potential Concerns
north	none	unimproved land / none	none observed
east	none	unimproved land / none	none observed
(north to south)	Northline Road	single family residential dwelling	none observed
southeast	26925 Northline Road	light industrial/manufacturing / Mcleod Interiors	potential light industrial/manufacturing activities
south	26975 Northline Road	light industrial/manufacturing / Printwell	potential light industrial/manufacturing activities
(from east to west)	27001-27051 Northline Road	light industrial/manufacturing / Ram Truck and Trailer Service Inc.	potential light industrial/manufacturing activities

Direction	Address	Current Use / Occupant	Potential Concerns
	27101 Northline Road	light industrial/manufacturing / Deluxe Data Printers	potential light industrial/manufacturing activities
	27165 Northline Road	light industrial/manufacturing / Sid Savage Auto Dealer Supply	potential light industrial/manufacturing activities
4.7	27195-27225 Northline Road	light industrial/manufacturing / Taylor Trade Center III	potential light industrial/manufacturing activities
	27227-27255 Northline Road	light industrial/manufacturing / Taylor Trade Center IV	potential light industrial/manufacturing activities
southwest	none	unimproved land / none	none observed
west	27400 Northline Road	commercial / Advanced Career Institute	none observed
(from south to	Inkster Road	single family residential dwelling	none observed
north)	none	agricultural land	none observed
	Inkster Road	single family residential dwellings	none observed
northwest (south to	12261 Inkster Road	light industrial/manufacturing / Thermal Craft Window Corp	potential light industrial/manufacturing activities
north)	12207 Inkster Road	maintenance yard / Arrow Sweeping and Line Stripping	potential maintenance and storage activities
_	Brest Street	single family residential dwellings	none observed

Based on AKT Peerless' visual observations, the current uses of the adjoining properties do not appear to pose a direct environmental threat to the subject property, except for the adjoining properties to the southeast, south, and northwest which are utilized for light industrial/manufacturing operations, and the adjoining property to the northwest which is utilized as a maintenance yard for a parking lot maintenance company. See Section 4.3.1 for further information on these potential environmental concerns.

4.0 <u>RECORDS REVIEW</u>

The objective of the records review is to evaluate reasonably ascertainable databases, historical records, and physical setting records to help identify recognized environmental conditions at the subject property and, to the extent identifiable, at surrounding properties.

4.1 PHYSICAL SETTING SOURCES

AKT Peerless reviewed geological survey maps for geologic, hydrologic, and topographic conditions that may affect potential contaminant migration to the subject property.

4.1.1 Topography and Area Hydrogeology

According to the USGS' 7.5 Minute Topographic Map of the Flat Rock NE/Michigan Quadrangle, which was published in 1967 and was photorevised in 1973 and 1980, the subject property is situated between 620 and 625 feet above the National Geodetic Vertical Datum (NGVD). The subject property's topography appears decline gently to the southeast.

AKT Peerless did not obtain or review reports that document actual groundwater conditions at or adjacent to the subject property. Therefore, AKT Peerless was unable to (1) identify the depth to shallow groundwater beneath the subject property, or (2) determine the groundwater flow direction beneath the subject property.

Typically, the water table aquifer flows toward a major drainage feature or in the same direction as the drainage basin. The Sutliff and Kenope Drain, and an unnamed drain, which flow to the southeast, run across the subject property. Therefore, AKT Peerless infers that groundwater beneath the subject property flows to the southeast, with potential influence from the Sutliff and Kenope Drain, and the unnamed drain.

AKT Peerless' research did not identify any known groundwater recharge area on or near the subject property, or any groundwater supply or monitor wells on the subject property. Groundwater from the area of the subject property does not serve as the primary drinking water source for properties in Taylor, which obtains its municipal water from the Detroit Water and Sewerage Department. Public sources of information do not identify main aquifers below the subject property.

4.1.2 Area Geology and Soils

According to the MDNR Geological Survey Division's *Bedrock Geology of Southern Michigan* (1987), bedrock beneath the subject property is classified as Dundee Limestone of an unassigned group, which is included in the Erian series within the Devonian system of the Paleozoic Era. The depth to bedrock beneath the subject property was not readily available prior to the completion of this Phase I ESA.

According to the Michigan Geological Survey Division's publication, *Quaternary Geology of Southern Michigan*, soils in the area are lacustrine clay and silt. These soils are described as gray to dark reddish brown and are varved in some localities. The soil chiefly underlies extensive, flat, low-lying areas formerly inundated by glacial Great Lakes, but also occurs in separate, small lake basins, and includes small areas of lacustrine sand and clay-rich till. Soil thickness ranges from 1-30 feet. Typically, lacustrine clay and silt are associated with low hydraulic permeability and restrict the movement of groundwater.

According to the USDA's Soil Survey of Wayne County, Michigan (1977), soil at the subject property is classified as belonging to the Belleville-Selfridge-Tedrow loamy substratum association, which is described as nearly level to gently sloping, very poorly drained to somewhat poorly drained soils that have a coarse textured to moderately fine textured subsoil over a coarse textured to moderately fine textured substratum. As indicated on Photo Sheet 28 of the soil survey, subject property soils are described as belonging to Belleville loamy fine sand,

Made land, Tedrow loamy fine sand, 0 to 2 percent slopes, Pella silt loam, Pewamo loam, and Selfridge-Pewamo complex, 0 to 2 percent slopes.

AKT Peerless did not obtain other information about the subject property's soil during this Phase I ESA.

4.2 STANDARD ENVIRONMENTAL RECORD SOURCES

AKT Peerless retained EDR to provide current environmental database information compiled by a variety of federal and state regulatory agencies. The purpose of obtaining this data was to evaluate potential environmental risks associated with the subject property, adjoining sites, and other sites that are (1) identified on target lists, and (2) within varying distances of up to one mile from the subject property. AKT Peerless reviewed the following federal and state databases for such listings within the indicated search radii.

Туре	Regulatory Agency Database	Approximate Minimum Search Distance
Federal	National Priority List (NPL)	1 mile
Federal	De-listed National Priority List (DNPL)	½ mile
Federal	Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	½ mile
Federal	CERCLIS No Further Remediation Action Planned (NFRAP) Site List	½ mile
Federal	Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) Facilities List	1 mile
Federal	RCRA non-CORRACTS Treatment, Storage or Disposal (TSD) Facilities List	½ mile
Federal	RCRA Generators List	subject property and adjoining properties
Federal	Institutional Control / Engineering Control Registries*	subject property
Federal	Environmental Response and Notification System (ERNS)	subject property
State & Tribal	Hazardous Waste Sites (HWS) (equivalents to NPL and CERCLIS)	1 mile
State & Tribal	Solid Waste Facilities/Landfill Sites (SWLF)	½ mile
State & Tribal	Historical Landfill Site (HIST LF)	½ mile
State & Tribal	Leaking Underground Storage Tank (LUST) List	½ mile
State & Tribal	Registered Underground Storage Tank (UST) List	subject property and adjoining properties
State & Tribal	Institutional Control / Engineering Control Registries*	subject property
State & Tribal	Brownfield Sites	½ mile
State	Baseline Environmental Assessment (BEA) Sites	½ mile
Either	Unmappable Database Listings (a.k.a. Orphan Sites)	database-dependent

* Neither the US EPA nor Michigan Tribal Governments nor the State of Michigan maintains registries of sites with Institutional Controls / Engineering Controls in the subject property area.

4.2.1 Subject Property and Occupant Listings

The EDR Report (Appendix D) does not identify the subject property or its known occupants on the referenced databases.

4.2.2 Adjoining and Nearby Sites

AKT Peerless' review of the referenced databases (including those on the orphan list) also considered the potential or likelihood of contamination from adjoining and nearby sites. To evaluate which of the adjoining and nearby sites identified in the EDR present an environmental risk to the subject property, AKT Peerless considered the following criteria:

- the type of database on which the site is identified.
- the topographic position of the identified site relative to the subject property.
- the direction and distance of the identified site from the subject property.
- local soil conditions in the subject property area.
- the known or inferred groundwater flow direction in the subject property area.
- the status of the respective regulatory agency-required investigation(s) of the identified site, if any.
- surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) located between the identified site and the subject property.

Only those sites that are judged to present a potential environmental risk to the subject property are further evaluated by reviewing MDEQ file information. Using the referenced criteria, and based upon a review of readily available information contained within the EDR Report, AKT Peerless did not identify adjoining (i.e., bordering) or nearby sites (e.g., properties within a ¼-mile radius) listed in the EDR Report that were judged to present a potential environmental risk to the subject property, except for the following:

Database			
Database(s):	RCRA-CESQG	Distance:	adjoining
Name:	Mcleod Design Group	Direction:	southeast
Address:	26925 Northline Road	Elevation:	623 feet
Section References:	Refer to Section 4.3.1 for further information.	Inferred Groundwater Flow Direction:	southeast

Mcleod Design Group is classified as a RCRA Conditionally Exempt Small Quantity Generator (CESQG), which means that it generates between 100 and 1,000 kg of hazardous waste in a given calendar month and accumulates less than 6,000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste per calendar month and accumulates less than 1,000 kg of hazardous waste at any time. Mcleod Design Group has not reported TSD activities and has no reported RCRA violations.

Database			
Database(s):	RCRA-SQG, FINDS	Distance:	adjoining
Name:	Itochu Chemicals America Inc.	Direction:	south
Address:	27227 Northline Road	Elevation:	625 feet
Section References:	Refer to Section 4.3.1 for further information.	Inferred Groundwater Flow Direction:	southeast

Itochu Chemicals America Inc. is classified as a RCRA Small Quantity Generator (SQG) and has not reported transport, storage, or disposal (TSD) activities, and has received four RCRA violations. Compliance has been achieved with respect to all of these violations since September 2007. The presence of this site on the Federal Index System (FINDS) database indicates that it is a facility that is regulated by the EPA.

Database Database			
Database(s):	RCRA-CESQG	Distance:	adjoining
Name:	Techmire USA	Direction:	south
Address:	27211 Northline Road	Elevation:	625 feet
Section References:	Refer to Section 4.3.1 for further information.	Inferred Groundwater Flow Direction:	southeast

Techmire USA is classified as a RCRA Conditionally Exempt Small Quantity Generator (CESQG) which means that it generates 100 kg or less of hazardous waste per calendar month and accumulates 1,000 kg or less of hazardous waste at any time, or generates 1 kg or less of acute hazardous waste per month or accumulates less than 1 kg of acute hazardous waste at any time. Techmire USA has not reported TSD activities and has no reported RCRA violations.

Database			
Database(s):	RCRA-NonGen, FINDS	Distance:	adjoining
Name:	Deluxe Data Printers Inc	Direction:	south
Address:	27101 Northline Road	Elevation:	625 feet
Section References:	Refer to Section 4.3.1 for further information.	Inferred Groundwater Flow Direction:	southeast

Deluxe Data Printers is classified as a RCRA Non Generator (NonGen), which means that at one time it was generating hazardous waste but has since ceased hazardous waste generating operations. Deluxe Data Printers has not reported TSD Activities, and has one reported RCRA violation. Compliance was achieved with respect to this violation in March 1994.

Database				
Database(s):	RCRA-NonGen, FINDS	Distance:	adjoining	
Name:	Heidelberg Eastern Inc	Direction:	south	
Address:	26975 Northline Road	Elevation:	624 feet	
Section References:	Refer to Section 4.3.1 for further information.	Inferred Groundwater Flow Direction:	southeast	

Heidelberg Eastern Inc is classified as a RCRA Non Generator (NonGen), has not reported TSD Activities, and has no reported RCRA violations.

Database			
Database(s):	RCRA-NonGen, RCRA-CESQG, FINDS	Distance:	adjoining
Name:	Printwell Inc	Direction:	south
Address:	26975 and 27001 Northline Road	Elevation:	623 feet
Section References:	Refer to Section 4.3.1 for further information.	Inferred Groundwater Flow Direction:	southeast

Printwell Inc located at 26975 Northline Road is classified as a RCRA Conditionally Exempt Small Quantity Generator (CESQG), has not reported TSD activities, and has no reported RCRA violations. In addition, Printwell Inc at 26975 Northline Road was identified on the FINDS Database

Printwell Inc located 27001 Northline Road is classified a RCRA Non Generator (NonGen), has not reported TSD Activities, and has no reported RCRA violations.

4.3 ENVIRONMENTAL RECORD SOURCES

4.3.1 MDEQ Waste and Hazardous Material Division (WHMD) Records

Subject Property

AKT Peerless contacted the MDEQ WHMD to review available records regarding waste management activities, permits, inspections, violations, and registered USTs associated with the subject property and select adjoining properties. The WHMD did not have files associated with the subject property. AKT Peerless also referenced the WHMD Waste Data System (WDS) for information regarding the subject property and select adjoining properties. The WDS tracks activities at facilities regulated by the Solid Waste, Scrap Tire, Hazardous Waste, and Liquid Industrial Waste programs. The WDS did not have files associated with the subject property.

26925 Northline Road, (Southeastern Adjoining Property)

The WHMD did not have files associated with this southeastern adjoining property. AKT Peerless also referenced the WDS for information regarding this southeastern adjoining property. According to the WDS this site was classified as LIW in 1970. It has been owned and occupied by Mcleod Design Group since 1981, and has been classified as CESQG since 2003. The WDS does not report violations or contain other records for this southeastern adjoining property.

It is AKT Peerless' opinion that this adjoining property to the southeast does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically down-gradient from the subject property, (2) is has not reported TSD activities, (3) it has no reported RCRA violations, and (4) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

27227 Northline Road, (Southern Adjoining Property)

According to the files kept at the WHMD, Itochu achieved compliance with respect to several violations related to record keeping and the labeling of hazardous waste in September 2007. Itochu's operations involve the generation of aluminum paste and nitride. These files also included a hazardous waste contingency plan, and indicate that Itochu has not had any reported spills.

AKT Peerless also referenced the WDS for information regarding this southern adjoining property. According to the WDS this site has occupied by Itochu Chemicals America Inc since 1975, and has also been occupied by Hankyu International Transport Since 1987. This site was classified as a Large Quantity Generator (LQG) from 2000 until 2005, when it was reclassified as SQG. From August through September 2007, this classification was changed once again to LQG. This site has been classified as SQG since December 31, 2007. Itochu Chemicals America Inc received four RCRA violations on March 3, 2006, and achieved compliance with respect to all of these violations on September 18, 2007. The WDS does not contain other records for this southern adjoining property.

It is AKT Peerless' opinion that this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically downgradient from the subject property, (2) is has not reported TSD activities, (3) it achieved compliance with respect to all RCRA violations in September 2008, and (4) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

27211 Northline Road, (Southern Adjoining Property)

The WHMD did not have files associated with this southern adjoining property. AKT Peerless referenced the WDS for information regarding this southern adjoining property. According to the WDS this site has been occupied by Techmire USA since 1994, and has been owned by Rea's Construction since 2005. This site has been classified as CESQG and LIW since 2005. The WDS does not report violations or contain other records for this southern adjoining property.

It is AKT Peerless' opinion that this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically downgradient from the subject property, (2) is has not reported TSD activities, (3) it has no reported RCRA violations, and (4) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

27101 Northline Road, (Southern Adjoining Property)

According to the WHMD, this southern adjoining property is occupied by Deluxe Data. In 1994 it received RCRA violations due to the improper labeling of 55-gallon drums that contained ink solution. In addition, cracks were found in the floor of a containment area. Deluxe Data achieved compliance with respect to these violations in 1994.

AKT Peerless also referenced the WDS for information regarding this southern adjoining property. According to the WDS this site was formerly occupied by Delta Data Printers and is currently occupied by Deluxe Data Printers Inc. The former occupant was classified as LIW in 1970. The current occupant was classified as SQG from 1990 until 1998 when it ceased hazardous waste generating operations and was reclassified as NonGen. Deluxe Data Printers Inc received one RCRA violation in March 1994, and achieved compliance with respect to this violation in that same month. The WDS does not contain other records for this southern adjoining property.

It is AKT Peerless' opinion that this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically down-

gradient from the subject property, (2) is has not reported TSD activities, (3) it achieved compliance with respect to all RCRA violations in March 1994, and (4) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

26975 Northline Road, (Southern Adjoining Property)

The WHMD did not have files associated with this southern adjoining property. AKT Peerless also referenced the WDS for information regarding this southern adjoining property. According to the WDS this site was occupied by Heidelberg Eastern Inc. until 1986 when it went out of business and ceased hazardous waste generating activities. This has been occupied by Printwell Inc Since 1990, which has been classified as CESQG and LIW since 1999. The WDS does not report violations or contain other records for this southern adjoining property.

It is AKT Peerless' opinion that this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically downgradient from the subject property, (2) is has not reported TSD activities, (3) it has no reported RCRA violations, and (4) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

27001 Northline Road, (Southern Adjoining Property)

The WHMD did not have files associated with this southern adjoining property. AKT Peerless also referenced the WDS for information regarding this southern adjoining property. According to the WDS, this site has been occupied by Printwell Inc since 1990 (former occupant), which ceased the generation of Hazardous Waste in 2003 and was an emergency site. Printwell Inc ceased the generation of hazardous waste once again in 2007. The WDS does not report violations or contain other records for this southern adjoining property.

It is AKT Peerless' opinion that this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically downgradient from the subject property, (2) is has not reported TSD activities, (3) it has no reported RCRA violations, and (4) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

27165 Northline Road, (Southern Adjoining Property)

AKT Peerless referenced the WDS for information regarding this southern adjoining property. The WDS does not contain records for this property. It is AKT Peerless' opinion that this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) it is located hydraulically down-gradient from the subject property, (2) it is not identified on the WDS or EDR as a handler or storer of hazardous waste or materials, and (3) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

27400 Inkster Road, (Western Adjoining Property)

AKT Peerless referenced the WDS for information regarding this western adjoining property. The WDS does not contain records for this property. It is AKT Peerless' opinion that this adjoining property to the west does not appear to present an environmental concern to the subject property due to (1) it is not identified on the WDS or EDR as a handler or storer of hazardous

waste or materials, and (2) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

12261 Inkster Road, (Northwestern Adjoining Property)

AKT Peerless referenced the WDS for information regarding this northwestern adjoining property. The WDS does not contain records for this property. It is AKT Peerless' opinion that this adjoining property to the northwest does not appear to present an environmental concern to the subject property due to (1) it is not identified on the WDS or EDR as a handler or storer of hazardous waste or materials, and (2) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

12207 Inkster Road, (Northwestern Adjoining Property)

AKT Peerless referenced the WDS for information regarding this northwestern adjoining property. The WDS does not contain records for this property. It is AKT Peerless' opinion that this adjoining property to the northwest does not appear to present an environmental concern to the subject property due to (1) it is not identified on the WDS or EDR as a handler or storer of hazardous waste or materials, and (2) AKT Peerless did not observe improper hazardous material handling or storage activities during the reconnaissance.

4.3.2 MDEO Remediation and Redevelopment Division (RRD) Records

Subject Property

AKT Peerless reviewed the RRD's Perfected Lien List dated August 11, 2009 to determine if environmental cleanup liens had been filed against the subject property. According to the Perfected Lien List, the MDEQ does not have record of environmental cleanup liens filed against the subject property.

AKT Peerless contacted the MDEQ-RRD Southeast Michigan District Office, and the MDEQ online Underground Storage Tank database to review available records regarding environmental information or leaking USTs associated with the subject property and select adjoining properties. According to the MDEQ-RRD, records were not identified for the subject property.

Ferrino Excavation Landfill, (Former Occupant, Southern Nearby Property)

AKT Peerless reviewed files at the RRD for this southern nearby property. According to the RRD, this southern nearby property was formerly occupied by Ferrino Excavation Landfill, located approximately a quarter mile south of Northline road. In April 2006, D & G Building Company submitted a permit application to the MDEQ to construct two industrial buildings with associated driveways and paved areas on this site. This permit detailed plans to relocate drainages and wetland areas that would be disturbed by this construction project. These files did not indicate if the permit was awarded, or if the project was ever carried out. The files at the RRD did not contain other information or records associated with the former occupant of this southern adjoining property. See Section 4.4.1 for more information regarding the former occupant of this southern adjoining property.

4.4 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

4.4.1 Local Health Department

Subject Property

The Wayne County Health Department indicated that they do not have records pertaining to the subject property.

Ferrino Excavation Landfill, (Former Occupant, Southern Nearby Property)

The Wayne County Health Department indicated that this southern nearby property was formerly occupied by Ferrino Excavation Landfill. In September 1981, the Wayne County Health Department conducted a site inspection at this property in response to several complaints about illegal dumping activities. The inspection identified two areas where black foundry sand and building debris had been stockpiled. The site owner was found guilty of illegally accepting foundry sand and chemical waste at an unlicensed disposal area. The owner was issued a court order to cleanup the site. In July 1982, approximately 100-200 cubic yards of foundry sand and debris were pushed into a pile and then removed from the site. According to a Closed Landfill Survey from April 1994, the foundry sand and chemical waste had been removed from the site, and the site had been backfilled with sand.

It is AKT Peerless' opinion that the former usage of this adjoining property to the south does not appear to present an environmental concern to the subject property due to (1) the distance of the former dumping site (approximately one quarter mile south) from the subject property, (2) it is located hydraulically down-gradient from the subject property, (3) dumping activities ceased in 1982, and (4) approximately 100-200 cubic yards of foundry sand and debris were removed from the site.

4.4.2 Local Fire Department

According to Fire Marshal John Hager, the Taylor Fire Department maintains its records based on addresses. The subject property is not currently associated with an address, and Mr. Hager indicated that he did not identify files associated with the subject property's parcel numbers. In addition, the Taylor Fire Department indicated that they did not have records or knowledge regarding storage tanks, releases, or incident reports for 12821 Inkster Road, an address that was formerly associated with Parcel A of the subject property.

4.4.3 Water & Sewage Utility Provider

Municipal water and sewerage services are not currently provided to the subject property, which has consisted of unimproved vacant land since at least 1937. The City of provides municipal water and sewer services to the subject property area. The City of Taylor Public Works Department's sanitary waste is ultimately received for processing by the City of Detroit Water & Sewerage Department (DWSD).

4.4.4 Natural Gas Provider

Natural gas services are not currently provided to the subject property, which has consisted of unimproved vacant land since at least 1937. DTE Energy provides natural gas to the subject property area.

4.4.5 Previous Environmental Reports

AKT Peerless was not provided with copies of reports that document previous investigations or assessments of the subject property, nor did AKT Peerless identify the existence of such documents during this assessment.

4.5 HISTORICAL USE INFORMATION

The objective of reviewing historical sources is to: (1) develop a history of previous uses or specific occupancies of the subject property, (2) identify those uses or specific occupancies that are likely to have led to potential environmental concerns at the subject property, and to the extent identifiable, at adjoining properties, and (3) identify obvious uses of the subject property from the present, back to the property's *obvious* first developed use, or back to 1940, whichever is earlier.

Historical Summary - Subject Property

The following table summarizes the general development and use of the subject property, as identified by AKT Peerless.

Time Period	Improvements	Use	Owner / Occupant	Data Source(s)
1937 – c.1984	none apparent	agriculture (row crops)	not identified / none	municipal records aerial photographs city directories topographic map soil survey interviews
c.1985- c.1992	none apparent on Parcel A, surface disturbance is visible on Parcel B.	potential mining and filling activities on Parcel B	not identified	municipal records aerial photographs city directories interviews
c.1993- present	none apparent	none apparent	City of Taylor / none	municipal records aerial photographs city directories interviews reconnaissance

The subject property has consisted of unimproved vacant land since at least 1937. The Kenope and Sutliff Drain runs across the central portion of Parcel B of the subject property and an unnamed drain runs across Parcel A of the subject property. In the mid 1980s, the surface of Parcel B of the subject property appears to have been disturbed due to potential mining and filling activities. By at least 1993 these activities were no longer apparent, and the subject property has consisted of unimproved vacant land that is not being used for an obvious or significant purpose since that time.

Historical Summary - Adjoining Properties

North

The adjoining property to the north, beyond Brest Street, has consisted of unimproved wooded land since at least 1937. Former or current occupants of this northern adjoining property were not identified.

East

The northern portion of the eastern adjoining property consisted of agricultural land that was used for the production of row crops from at least 1937 until approximately 1972. At that time the surface was disturbed due to apparent mining and filling activities. Since at least 1985, the property has consisted of vacant land that is not being used for an obvious or significant purpose. Former or current occupants of this eastern adjoining property were not identified.

The southern portion of the eastern adjoining property consisted of unimproved land used for the production of row crops from at least 1937 until approximately 1940 when it was improved with a single family residential dwelling and associated driveways and landscaped areas. The only identified use of this property since that time has been a single family residential dwelling.

Southeast

The adjoining property to the southeast, located beyond Northline Road at 26925 Northline Road, was unimproved agricultural land used for the production of row crops from at least 1937 until approximately 1972, when its surface was disturbed due to apparent mining and filling activities. By approximately 1981 these activities had ceased and the property was improved with a light industrial/manufacturing facility and associated paved and landscaped areas. Identified historical occupants of this property since that time include Gizzi Metal Erectors. This property is currently occupied by Mcleod Interiors.

South

The adjoining properties to the south, located beyond Northline Road at 26975-27255 Northline Road (odd numbers only), were unimproved agricultural land used for the production of row crops from at least 1937 until approximately the mid 1980s. At that time the property consisted of unimproved land that was not being used for an obvious or significant purpose. This property was improved with multiple light industrial/manufacturing buildings and associated paved and landscaped areas throughout the 1990s. Identified historical occupants of these properties since that time include Pro Equipment International, Lessco Services Inc, ETA Services, Livingston International Inc, Wilson International, Glenn Michaels Production, Union Transport Corporation, Garaga Great Lakes Inc, Heidelberg East, and Delta Data Printers Inc. The current occupants of these southern adjoining properties (from east to west) include Printwell, Ram Truck and Trailer Service Inc, Deluxe Data Printers, Sid Savage Auto Dealer Supply, Taylor Trade Center III, and Taylor Trade Center IV.

Southwest

The adjoining property to the southwest, located beyond the intersection of Inkster and Northline Roads, consisted of unimproved agricultural land used for the production of row crops from at least 1937 until approximately 1960. Since that time it has consisted of unimproved land that is

not being used for a significant or obvious purpose. Current or former occupants were not identified for this southwestern adjoining property.

<u>West</u>

The southernmost adjoining property to the west, located beyond Inkster Road at 27400 Inkster Road, was unimproved agricultural land used for the production of row crops from at least 1937 until approximately the mid 1980s when it was improved with a light industrial/manufacturing building and associated paved and landscaped areas. Identified former occupants include Motor City Vinyl. The property is currently occupied by Advanced Career Institute.

The central portion of the adjoining property to the west, located beyond Inkster Road consisted of unimproved agricultural land used for the production of row crops from at least 1937 until approximately the early 1960s. At that time the property was improved with a single family residential dwelling and associated paved and landscaped areas. The only identified use of this property since that time has been for a single family residential dwelling.

The northernmost portion of the adjoining property to the west has consisted of unimproved agricultural land that is used for the production of row crops since at least 1937. Current or former occupants were not identified for this western adjoining property.

Northwest

The southernmost portion of the adjoining property the northwest consisted of a residential dwelling surrounded by associated agricultural land used for the production of row crops from at least 1937 until approximately the early 1960s when the agricultural land was improved with additional residential dwellings. Single family residential dwellings are the only identified use of this property since that time.

The southern-central adjoining property to the northwest, located at 12261 Inkster Road, consisted of agricultural land that was used for the production of row crops from at least 1937 until approximately 1985 when it was improved with a light industrial/manufacturing building and associated driveways. Identified historical occupants include Gross Ile Sheet Metal. This property is currently occupied by Thermal Craft Window Corporation.

The northern-central adjoining property to the northwest, located at 12207 Inkster Road, consisted of agricultural land that was used for the production of row crops from at least 1937 until approximately 2000, when it was improved as a maintenance yard for a parking lot maintenance business. The only identified historical occupant since that time is B & J Parking lot maintenance. The property is currently occupied by Arrow Sealcoating Sweeping & Line Stripping Inc.

The northernmost adjoining property to the west consisted of unimproved agricultural land that was used for the production of row crops from at least 1937 until approximately the mid 1950s. At that time the property was improved with several single family residential dwellings. Single family residential dwellings have been the only identified use of this property since that time.

4.5.1 Aerial Photographs

AKT Peerless obtained aerial photographs for the subject property from the EDR. AKT Peerless' observations noted during the review of these photographs are summarized in the following table. Photocopies of select aerial photographs are presented as Appendix E.

Photo Dates	Observations (Subject Property)	Potential Environmental Concerns	
1937			
1940			
1949	Parcels A and B of the subject property are shown as unimproved		
1957	cropland.	none observed	
1961			
1967			
1972			
1985	Parcel A of the subject property consists of unimproved land, Parcel B shows surface disturbance, potentially related to mining and filling activities.	potential mining and land filling activities	
1993			
2000	Parcels A and B of the subject property are shown as unimproved land that is not being used for an obvious or significant purpose.	none observed	
2005	that is not being used for an obvious of significant purpose.		

AKT Peerless' review of historical aerial photographs of the adjoining properties is summarized in the following table.

Photo Dates	Potential Environmental Concerns (Adjoining Properties)	
1937		
1940		
1949	No obvious evidence or indications of recognized environmental conditions or other potential	
1957	environmental concerns were noted with respect to the adjoining properties during AKT Peerless' review of the referenced aerial photographs, except for the following; (1) the adjoining properties to	
1961	the east and southeast appear to have surface disturbances potentially related to mining and/or filling	
1967	activities in the 1972 photograph, (2) the adjoining properties to the south have been developed with	
1972	light industrial/manufacturing buildings beginning in early 1990s, and (3) the adjoining properties to	
1985	the northwest appear to have been developed with a light industrial/manufacturing building in	
1993	approximately 1985 and a maintenance yard in approximately 2000. See Sections 4.3.1 and 4.3.2	
2000	more information on these potential environmental concerns.	
2005		

4.5.2 Fire Insurance Maps

AKT Peerless' research did not identify historical fire insurance map coverage of the subject property or adjoining properties.

4.5.3 <u>City Directories</u>

City directories from various years between 1961 and 2009 were reviewed at the Bresser's Cross-Reference Directory archival library. The purpose of this review was to determine the

past occupancy of the subject property and adjoining properties; however, the subject property consists of vacant land and is not currently associated with an address. AKT Peerless did identify one historical address, 12821 Inkster Road, associated with a barn structure that according to the records viewed at the City of Taylor Assessing Department was formerly located on Parcel A of the subject property. This address was not listed in the city directories viewed by AKT Peerless.

An address that is not listed typically indicates that (1) the property was vacant at that time, (2) a potential building was unoccupied at that time, (3) a previously existing address was different than the current address, (4) the building was not represented in the directory because of a "lag time" between building the structure and compiling the list, or (5) occupant information was not available for inclusion into the directory.

AKT Peerless also reviewed city directories for select adjoining properties to determine their past occupancy. No obvious environmental concerns associated with historical occupants of the adjoining properties were noted, except for the adjoining properties to the southeast, south, west and northwest which began to be occupied by light industrial/manufacturing businesses beginning in the early 1980s. However, as discussed in Section 4.3.1, these adjoining properties do not appear to present an environmental concern to the subject property.

4.5.4 Assessing Department Records

AKT Peerless reviewed tax assessment records on the subject property at the Taylor Assessing Department. The following table summarizes features or items of potential environmental concern, if any, that were noted during the record review.

Environmental Issue	Comments
Storage Tanks	none identified
Asbestos-Containing Materials	none identified
PCB Materials	none identified
On-site Well/Septic System	none identified
Disposal Facilities/Fill Material (e.g., lagoons, pits, landfills, etc.)	none identified

In addition, the records kept by the Taylor Assessing Department included a Residential Building Record from June 1991, associated with Parcel A of the subject property. This record indicated that a city owned barn with the address 12821 Inkster was constructed on the subject property in 1930. AKT Peerless did not identify other records for this address throughout the course of this ESA. In addition, AKT Peerless did not identify this structure on historical aerial photographs. The subject property appears to have consisted of unimproved vacant land since at least 1937.

No additional information that could indicate potential environmental concerns at the subject property was found in the records. Copies of information obtained from the Taylor Assessing Department are included in Appendix F.

4.5.5 **Building Department Records**

AKT attempted to view building records for the subject property at the Taylor Building Department; however, the department did not contain records associated with the subject property, which consists of vacant land.

5.0 <u>INTERVIEWS</u>

5.1 INTERVIEW WITH SUBJECT PROPERTY OWNER/KEY SITE MANAGER

AKT Peerless provided owner and key site contact questionnaires to Ms. Linda Keacher on behalf of the City of Taylor regarding knowledge of the subject property. No information was reported that would be considered material to identifying recognized environmental conditions in connection with the subject property.

5.2 INTERVIEW WITH SUBJECT PROPERTY OCCUPANT(S)

The subject property was unoccupied during the course of this ESA.

5.3 INTERVIEW(S) WITH OTHERS

Other interviews were not conducted during the course of this ESA.

6.0 SUBJECT PROPERTY RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

The subject property reconnaissance consisted of visual and physical observations of the subject property. AKT Peerless visually and/or physically observed the periphery of the subject property. In addition, AKT Peerless observed the subject property from all adjacent public thoroughfares.

Mr. Dan Gold of AKT Peerless conducted the subject property reconnaissance on August 18, 2009. Mr. Gold was unaccompanied during the reconnaissance. AKT Peerless encountered the following project specific facts or conditions that limited our ability to access the subject property:

• Visual observations of the subject property were limited by the presence of dense vegetation growing throughout the property.

6.2 GENERAL SUBJECT PROPERTY SETTING AND OPERATIONS

The subject property consists of unimproved vacant land that is not being used for a significant or obvious purpose. In general, the subject property is higher than the adjoining properties to the south and east, but is lower than the adjoining properties to the north and west. AKT Peerless did not observe operations at the subject property which has consisted of vacant land since at least 1937.

6.3 OBSERVATIONS

6.3.1 <u>Hazardous Substances and Petroleum Products</u>

AKT Peerless did not observe hazardous substances or petroleum products at the subject property.

6.3.2 Hazardous and Non-Hazardous Waste

AKT Peerless did not observe hazardous or non-hazardous waste at the subject property, except for the following:

Material	Use / Location	Quantity	Observations
general refuse (i.e. plastic bags, food rappers, bottles etc.)	none / side of the road	small amounts	scattered throughout the property along Inkster and Northline Roads, does not present an environmental concern to the subject property

6.3.3 Storage Tanks

AKT Peerless did not observe evidence of current or former UST systems (e.g., vent pipes, fill ports, dispensing pumps, patched pavement, etc.) at the subject property.

AKT Peerless did not observe evidence of current or former AST systems (e.g., stands, secondary containments, etc.) at the subject property.

6.3.4 Unidentified Substances/Containers

AKT Peerless did not observe evidence of unidentified substances or other suspect containers on the subject property.

6.3.5 Potential PCB Containing Equipment

AKT Peerless inspected the subject property for the presence of liquid-cooled electrical units such as transformers and large capacitors. Such units are notable since they may be potential sources of PCBs (polychlorinated biphenyls). AKT Peerless did not observe suspect PCB-containing equipment at the subject property, except for the following:

Source Description	Source Location	Responsibility	Observations
one triple pole-mounted transformer	southwestern portion of Parcel A	DTE Energy	no evidence of a release

AKT Peerless observed one triple pole-mounted transformer on the southwestern portion of Parcel A of the subject property. These transformers are the responsibility of DTE Energy. In the event of a release incident, DTE Energy will repair the damaged or leaking electrical unit(s), and return the quality of the affected soil and groundwater, if any, to its pre-release condition. AKT Peerless did not observe evidence or indication of oil stains, leaks, or spills near the transformers.

6.3.6 Interior Staining / Corrosion

This subsection does not apply since there are no buildings at the subject property.

6.3.7 **Drains and Sumps**

This subsection does not apply since there are no buildings at the subject property.

6.3.8 <u>Discharge Features</u>

Storm water that falls upon the subject property appears to percolate directly into the ground or flow off-site onto adjoining properties. AKT Peerless did not observe storm water catch basins or drains on the subject property.

6.3.9 Pits, Ponds, and Lagoons

AKT Peerless did not observe evidence of pits, ponds, or lagoons, or evidence thereof, at the subject property.

6.3.10 Solid Waste Dumping / Landfills

AKT Peerless did not observe evidence of solid waste dumping or landfills at the subject property, except for the following:

Description	Location	Observed Environmental Concerns
soil mounds	southwestern portion of Parcel A	two soil mounds of unknown origins, overgrown with vegetation, may present an environmental concern to the subject property

6.3.11 Stained Soil, Stressed Vegetation, Stressed/Stained Pavement

AKT Peerless did not observe any evidence of stained soil, stressed vegetation, stressed pavement, or stained pavement at the subject property.

6.3.12 Well and Septic Systems

AKT Peerless did not observe physical evidence or indication of wells or septic systems at the subject property.

6.3.13 Other Observations

AKT Peerless did not observe evidence of other potential environmental concerns at the subject property.

6.4 NON-ASTM SCOPE CONSIDERATIONS

AKT Peerless did not evaluate any other potential environmental conditions (i.e., further areas of possible business/environmental concern and/or liability) that are outside the scope of ASTM Standard Practice E 1527-05. Examples of such potential environmental conditions that were beyond the scope of this Phase I ESA include asbestos-containing materials (ACMs), cultural and historic resources, ecological resources, endangered species, health and safety, high-voltage power lines, indoor air quality, industrial hygiene, lead-based paints (LBPs), lead in drinking

water, moisture intrusion/suspect mold growth, noise pollution, radon, regulatory compliance/non-compliance and/or wetlands.

AKT Peerless advises users of this document who wish to obtain an evaluation of the subject property relative to any of the aforementioned non-ASTM issues to engage the services of a qualified environmental professional.

7.0 CONCLUSIONS AND RECOMMENDATIONS

7.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

We have performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Standard Practice E 1527-05 and AAI 40 CFR Part 312. Any exceptions to, or deletions from, this practice are described in Section 8 and Appendix A of this report. This assessment has revealed no evidence of RECs in connection with the subject property, except for the following:

- 1. As described in Section 4.5.1, AKT Peerless observed surface disturbances potentially related to mining and filling activities on Parcel B of the subject property in the 1985 aerial photograph. It is AKT Peerless' opinion that a potential exists for the subject property's soil and/or groundwater to have been adversely affected by the processes that caused the referenced surface disturbances.
- 2. As described in Section 6.3.10, AKT Peerless observed two soil mounds on the southwestern portion of Parcel A of the subject property. AKT Peerless was unable to determine the origin of these soil mounds. It is AKT Peerless' opinion that a potential exists for the subject property's soil and/or groundwater to have been adversely affected by the presence of these soil mounds.

Because RECs were identified during the performance of the Phase I ESA, further investigation and/or assessment is warranted in order to determine the nature, extent, magnitude, and materiality of the RECs associated with the subject property.

7.2 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

AKT Peerless did not identify HRECs in connection with the subject property.

7.3 POTENTIAL AREAS OF CONCERN AND SIGNIFICANT DATA GAPS

AKT Peerless did not identify other areas of potential concern in connection with the subject property during the course of this ESA.

AKT Peerless did not identify or encounter instances of significant data gaps during the course of this ESA.

8.0 **DEVIATIONS**

AKT Peerless did not deviate from ASTM Standard Practice E 1527-05 when performing this Phase I ESA (i.e., no components of that practice were deleted, and no additions to it were made).

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our knowledge and professional belief, we meet the definition of environmental professional as defined in ASTM E-1527-05 and §312.10 of 40 CFR 312 or conducted this inquiry under the supervision or responsible charge of, an environmental professional. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in ASTM E-1527-05 and 40 CFR Part 312.

Senior Staff Scientist

Environmental Science and Engineering

Compliance Specialist

Environmental Management Consultants

AREA OF EXPERTISE

- (1) Phase I environmental site assessments (ESAs)
- (2) Environmental compliance audits and reviews
- (3) Environmental management services such as waste characterization, waste minimization assessments, spill prevention plans, stormwater pollution prevention plans, environmental reporting, and environmental permitting
- (4) Project management, oversight, and coordination of Phase I ESAs, Phase II ESAs, and remediation projects

SUPPORTING AREAS OF EXPERTISE

- (1) Working knowledge of state and federal environmental regulations applicable to solid, hazardous, and medical waste management, wastewater discharges, toxic release inventory reporting, hazardous chemical inventory reporting, air emissions permitting, underground and aboveground storage tanks, oil pollution control, PCBs, asbestos, and OSHA hazard communication
- (2) Asbestos building inspections
- (3) Project management and field activities coordination

SUMMARY OF SELECTED PROJECTS

- (1) Performed Phase I ESAs (including project management, site reconnaissance, regulatory and historical records investigations, and report completion) for financial institutions, manufacturing facilities, real estate developers, property managers, and insurance companies. Properties included industrial, commercial, and residential sites as well as health care facilities.
- (2) Conducted environmental compliance audits for:
 - (a) Metal fabricating facilities (including stamping plants and welding operations)
 - (b) Plastics forming facilities
 - (c) Electronic equipment manufacturing facilities
 - (d) Foundries
 - (e) Metal plating operations
 - (f) Hospitals

Audits focused on determining the facilities' degree of compliance with applicable federal, state and local environmental regulations and recommending actions to achieve compliance.

- (3) Provided technical expertise and project management support for Wayne County's USEPA Brownfield Assessment Demonstration Pilot Project. The pilot project was designed to empower communities in the economic redevelopment of Brownfield sites through a \$200,000 USEPA grant. Duties include management, oversight and completion of Phase I ESAs; participation in Technical Advisory Committee meetings; budget tracking; and the identification and utilization of available resources from supporting agencies and communities.
- (4) Provided technical expertise to the Downriver Area Brownfield Consortium's (DABC) USEPA Brownfield Assessment Demonstration Pilot Project. The pilot project was designed to empower communities in the economic redevelopment of Brownfield sites through a \$200,000 USEPA grant. Duties included the management and completion of Phase I ESAs.

SUMMARY OF SELECTED PROJECTS (continued)

- (5) Prepared Spill Prevention Control and Countermeasure/Pollution Incident Prevention (SPCC/PIP) Plans for (1) bulk fuel storage facilities, (2) asphalt paving facilities (3) pharmaceutical supply companies, and (4) various manufacturing facilities.
- (6) Prepared Stormwater Pollution Prevention Plans for foundries and various manufacturing facilities.
- (7) Assembled an Environmental, Health, and Safety Policy Handbook for the aviation department of a large manufacturing company.
- (8) Prepared an annual Toxic Chemical Release Inventory (TRI/Form R) and Hazardous Chemical Inventory (Tier II) reports for:
 - (a) Metal fabricating facilities
 - (b) Heat treating facilities
 - (c) A pharmaceutical supply company
 - (d) Foundries
 - (e) Various manufacturing facilities
- (9) Completed National Pollutant Discharge Elimination System (NPDES) wastewater discharge permit applications for:
 - (a) Manufacturing facilities
 - (b) Groundwater remediation systems
- (10) Completed Critical Materials and Wastewater Reports for various manufacturing facilities.
- (11) Assembled and submitted formal petitions to the MDEQ for the designation of waste foundry sand as "inert for general reuse" and as "low hazard industrial waste," thus avoiding disposal costs. Petitions included information such as waste sand generation schematics, generation rates, raw material data, laboratory analysis data, and statistical analysis.
- (12) Conducted asbestos inspections of various buildings including:
 - (a) Manufacturing plants
 - (b) Commercial buildings
 - (c) Hospitals
 - (d) Residential structures
- (13) Managed Phase II subsurface investigations (including the coordination of soil boring and monitoring well installation, laboratory data interpretation, and report completion) to:
 - (a) Evaluate the potential presence of contaminants
 - (b) Evaluate the type of contaminants
 - (c) Delineate horizontal and vertical extent

CERTIFICATIONS

Certified Hazardous Materials Manager (CHMM) by the Institute of Certified Hazardous Materials Managers, Michigan

ISO 14001 Environmental Management Systems Lead Auditor Training (RAB Certified Course)

Accredited asbestos inspector by the Michigan Department of Labor and Economic Growth

Certified NIOSH Airborne Asbestos Dust Sampling and Evaluating

Health and Safety Training for Hazardous Waste Sites (OSHA-mandated 40-hour training and additional Site Supervisor Workshop)

APPENDIX A

GENERAL LIMITATIONS AND EXCEPTIONS

General Limitations and Exceptions

Subject to the proposal, scope-of-services, and the related terms and conditions referenced in Section 1.0 of this Phase I ESA, AKT Peerless accepts responsibility for the competent performance of its duties in executing the assignment and preparing reports in accordance with the normal standards of the profession, but disclaims any responsibility for consequential damages.

Although AKT Peerless believes that the findings, opinions, and recommendations contained herein are reliable and appropriate, AKT Peerless cannot warrant or guarantee that the information provided is exhaustive, or that the information obtained from any data sources is complete or accurate.

Along with the inherent limitations set forth in various sections of ASTM Standard Practice E 1527-05, the accuracy and completeness of this report may be limited by the following facts or conditions:

- Due to the poor scale of the historical aerial photographs, the presence or absence of small features (e.g., individual drums, fuel dispensers) could not be discerned reliably.
- AKT Peerless made reasonable efforts to determine if USTs or related equipment (collectively referred to as UST systems) are or have been present at the subject property. AKT Peerless defines reasonable efforts as obtaining and evaluating information from visual observations of unobstructed areas and from the secondary sources cited in this report. AKT Peerless recognizes, and suggests users of this assessment acknowledge, that the accuracy of our conclusions relative to the on-site presence or use of UST systems may be directly affected by the presence of physical obstructions at the time of the reconnaissance, or affected by our receipt and evaluation of incorrect information.
- AKT Peerless' evaluation of soil and groundwater features at and near the subject property
 was based only on published maps and other readily available information. AKT Peerless
 used this information to assess soil types and groundwater flow directions to determine if
 conditions at any nearby sites present an environmental threat to the subject property.
- Unless specifically noted otherwise, invasive investigation of any kind has not been performed during this Phase I ESA, nor has observation under floors, above ceilings, behind walls, within the surface and subsurface soil, within groundwater, within confined spaces, roof tops, or inaccessible areas been performed.
- AKT Peerless did not conduct sampling or analysis of air, soil, groundwater, surface water, or building materials as part of this Phase I ESA, unless specifically noted otherwise.
- This Phase I ESA did not include a physical inspection of the adjoining properties, which AKT Peerless observed from the subject property and from readily accessible public rightsof-way.
- AKT Peerless typically does not review historical or environmental information about nearby sites in detail unless known activities or events at a nearby site appear to present an environmental threat to the subject property.
- AKT Peerless' scope of services did not include conducting a review of property title

documentation. AKT Peerless requested property title documentation and environmental cleanup liens from the Client, but was not provided this information, unless specifically noted otherwise. However, as described in this report, AKT Peerless made reasonable attempts to determine if the State Environmental Agency maintains documentation regarding environmental liens recorded against the subject property.

- This assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems, that may be associated with the subject property.
- This Phase I ESA did not include any investigation or evaluation of issues not specifically related to petroleum products or hazardous substances as defined in CERCLA (i.e., other areas of potential business environmental risk such as radon, lead in drinking water, etc.).
- The information and opinions contained in the report are given in light of this assignment. The report must be reviewed and relied upon only in conjunction with the terms and conditions expressly agreed-upon by the parties and as limited therein.
- Although AKT Peerless believes the results contained in herein are reliable, AKT Peerless
 cannot warrant or guarantee that the information provided is exhaustive, or that the
 information provided by the Client, third parties, or the secondary information sources cited
 in this report is complete or accurate.
- AKT Peerless is not in a position to provide an opinion regarding the Fair Market Value of the subject property. Therefore, a comparison of the purchase price of the subject property to other similar real estate transactions was not conducted during this assessment.
- Nothing in this report constitutes a legal opinion or legal advice. For information regarding
 individual or organizational liability, AKT Peerless recommends consultation with
 independent legal counsel.
- AKT Peerless relied upon specific or common knowledge of the Client, or information provided to the Client, to identify environmental liens, institutional controls, activity use limitations, or property valuation issues. As possible within the time frame and cost of this project, AKT Peerless looked for any obvious environmental information regarding these issues made readily available during the course of this ESA.
- The information and opinions presented in this report are for the exclusive use of the Client. No distribution to or reliance by other parties may occur without the express written permission of AKT Peerless. AKT Peerless will not distribute this report without written consent from the Client, or as required by law or by a Court order.
- Any third parties to whom the right to rely on the contents of this report have been granted by AKT Peerless, which is explicitly required prior to any third-party release, expressly agrees to be bound by the original terms and conditions entered into by AKT Peerless and the Client.

with any questions or comments.

Disclaimer - Copyright and Trademark Notice

The EDR FieldCheck ®System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2009 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). AKT ENVIRONMENTAL CONSULTANTS used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by AKT ENVIRONMENTAL CONSULTANTS. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by AKT ENVIRONMENTAL CONSULTANTS of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ITOCHU CHEMICALS AMERICA INC	27227 NORTHLINE RD	SSW 0 - 1/8 (0.097 mi.)	1	7
ELKINS MACHINE AND TOOL CO INC	27510 NORTHLINE RD	SW 1/8 - 1/4 (0.137 ml.)	A4	16
SAINT GOBAIN ABRASIVES INC	27588 NORTHLINE RD	WSW 1/8 - 1/4 (0.173 mi.)	7	22

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by AKT ENVIRONMENTAL CONSULTANTS of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's' Contaminated Sites List on Diskette With Address.

An online review and analysis by AKT ENVIRONMENTAL CONSULTANTS of the SHWS list, as provided by EDR, and dated 05/15/2009 has revealed that there are 2 SHWS sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FERRINO EXCAVATION LANDFILL Facility Status: Inactive - no actions take	INKSTER BET. EUREKA / en to address contamination	S 1/4 - 1/2 (0.321 mi.)	13	48

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's Leaking Underground Storage Tank (LUST) Database.

An online review and analysis by AKT ENVIRONMENTAL CONSULTANTS of the LUST list, as provided by EDR, and dated 06/08/2009 has revealed that there are 3 LUST sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

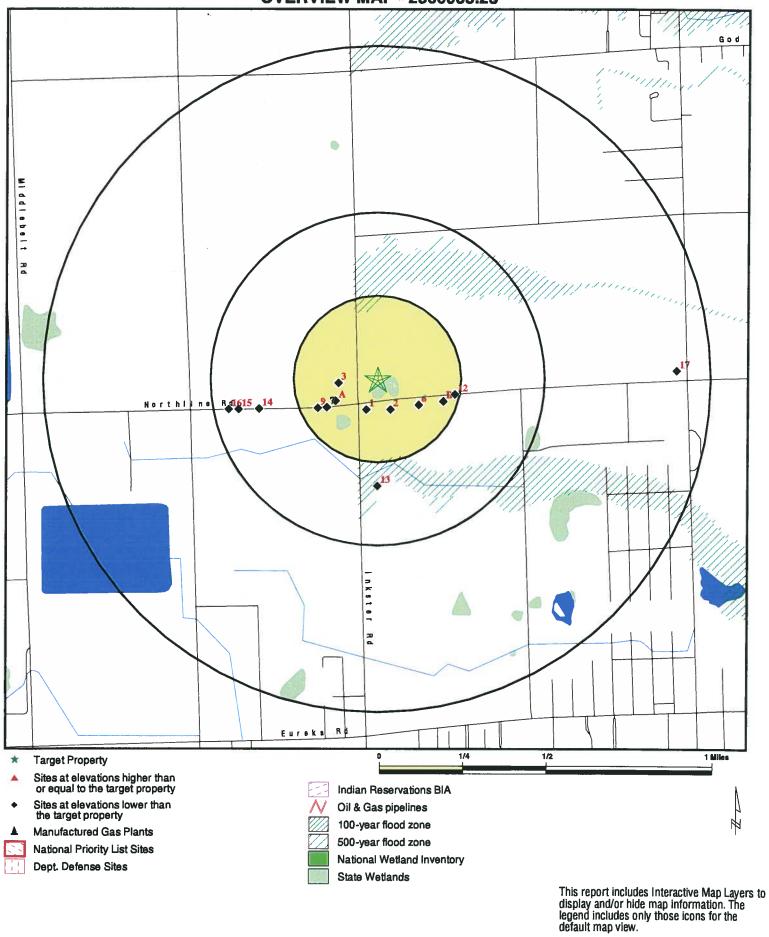

An online review and analysis by AKT ENVIRONMENTAL CONSULTANTS of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 6 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Biennial Reports:

Last Biennial Reporting Year: 2007

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

90

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs):

Waste code:

ode: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 14500

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are

transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/23/2009 Date Data Arrived at EDR: 04/28/2009 Date Made Active in Reports: 05/19/2009

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribai - equivalent CERCLIS

SHWS: Contaminated Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

BEA: BASELINE ENVIRONMENTAL ASSESSMENT DATABASE

A Baseline Environmental Assessment (BEA) allows people to purchase or begin operating at a facility without being held liable for existing contamination. BEAs are used to gather enough information about the property being transferred so that existing contamination can be distinguished from any new releases that might occur after the new owner or operator takes over the property.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Elevation: 626 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 42083-B3 FLAT ROCK NE, MI

Most Recent Revision: 1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

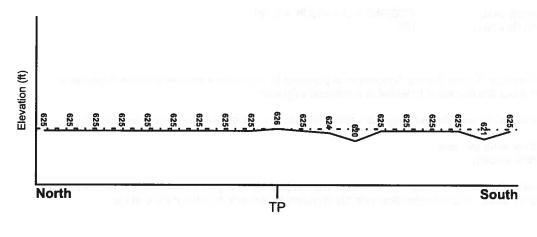

TOPOGRAPHIC INFORMATION

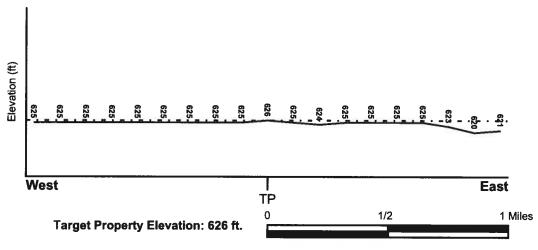

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles

Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

 ^{©1996} Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed unde a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:

Tedrow

Soil Surface Texture:

loamy fine sand

Hydrologic Group:

Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class:

Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min:

> 0 inches

Depth to Watertable Min:

> 46 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Natural Resources

Telephone: 517-241-2254

HYDROGEOLOGIC INFORMATION

AQUIFLOWR Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at

least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after

August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: MI Radon

Source: Department of Environmental Quality

Telephone: 517-335-9551 Radon Test Results

Michigan Radon Test Results

Source: Department of Environmental Quality

Telephone: 517-335-8037

These results are from test kits distributed by the local health departments and used by

Michigan residents. There is no way of knowing whether the devices were used properly, whether there are duplicates

(or repeat verification) test (i.e., more than one sample per home), etc.

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. Re: FOIA Request for AKT Pearless

I have received the request for records from AKT Pearless for two parcels identified as:

- 1) 051-99-0014-701
- 2) 051-99-0003-000

The fire department can only identify parcels by addresses. We can not provide information for this request at this time unless an address is provided.

If you have any questions, please contact me at (734) 374-1358.

Thank you,

John Hager, Fire Marshal City Of Taylor Fire & EMS

RE: Freedom Of Information Act Request # EH-09-189 Received From The Wayne County Dept. of Environment Regarding Parcels at NE Corner of Inkster and Northline Roads, Taylor, Michigan

Dear Mr. Gold:

The above-described request has been received and reviewed. After a diligent search for the requested records, I have determined and certify the records you requested do not exist. Therefore, your request is denied. If you can provide more specific information, your request will be reviewed to determine whether the desired records exist.

You have the right to do either of the following:

1) Submit a written request to the County Executive, which specifically states the word "appeal" and states the reason or reasons the denial should be reversed.

2) Commence an action in the circuit court to compel disclosure. Should you prevail, you will be entitled to have reasonable attorneys' fees, costs and disbursements assessed against the County by the court. If you or the County prevails in part, the court may, in its discretion, award you all or an appropriate portion of reasonable attorneys fees, costs and disbursements. If the court determines that the County has been arbitrary and capricious in its denial, you will be entitled to, in addition to actual damages, punitive damages in the amount of \$500.00.

Sincerely,

FOIA Officer

RE: Freedom of Information Act Request of – August 11, 2009 Northeast Corner of Inkster and Northline Roads, Taylor

Dear Mr. Gold:

This Division has no files for the specific site requested; however, please find attached a list of sites of environmental interest within an approximate one-mile radius of the site. This list is based only on information available to the Land Resource Management Division at the time of the request and in no way is to be interpreted as being an all-inclusive list of sites of environmental interest.

If you would like copies of any of the listed files maintained by the Division or would like to make an appointment to view the files, please do not hesitate to contact me at (734) 326-3936.

Sincerely,

Eric C. Anderson

STATE OF MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY SOUTHEAST MICHIGAN DISTRICT OFFICE

August 27, 2009

Mr. Daniel Gold AKT Peerless Environmental Services 22725 Orchard Lake Road Farmington, Michigan 48336

Dear Mr. Gold:

SUBJECT: Request for Disclosure of Official Files from Waste and Hazardous Materials
Division

This written notice is issued in response to your August 20, 2009, request for information under the Freedom of Information Act FOIA), MCL 15.231 *et seq.*, which was received by this office on August 20, 2009.

The purpose of the FOIA is to provide the public with access to existing, nonexempt public records of public bodies. Your request dated August 20, 2009, to examine or receive a copy of the following documents is denied.

Description of documents being denied: please see attached.

Reason for denial: To the best of this public body's knowledge, information, and belief, the public record does not exist under the name given by the requester, or by another name reasonably known to the public body.

Authority for denial: Public Act No. 442 of 1976, as amended, Section 3(1). Under Section 10 of the FOIA, you may do either of the following:

- 1) Appeal this decision in writing to the Director of the Michigan Department of Environmental Quality at P.O. Box 30473, Lansing, Michigan 48909-7917. The writing must specifically state the word "appeal," and must identify the reason or reasons you believe the denial should be reversed. The head of the department, or his designee, must respond to your appeal within 10 days after its receipt. Under unusual circumstances, the time for response to your appeal may be extended by 10 business days.
- 2) File an action in circuit court within 180 days after the date of the final determination to deny the request. If you prevail in such an action, the court is to award reasonable attorney fees, costs, and disbursements. Further, if the court finds the denial to be arbitrary and capricious, you may receive punitive damages in the amount of \$500.00.

Sincerely,

Mary F. Nikitin, FOIA Liaison

STATE OF MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY SOUTHEAST MICHIGAN DISTRICT OFFICE

August 13, 2009

Mr. Daniel Gold AKT Peerless Environmental Consultants 22725 Orchard Lake Road Farmington, MI 48336

Dear Mr. Gold:

SUBJECT: Request for Disclosure of Official Files from Southeast Michigan District Office

This written notice is issued in response to your August 11, 2009, request for information under the Freedom of Information Act (FOIA), MCL 15.231 et seq., which was received by this office on August 12, 2009.

The purpose of the FOIA is to provide the public with access to existing, nonexempt public records of public bodies. Your request dated August 11, 2009, to examine or receive a copy of the following documents is denied.

See Attached

Reason for denial: To the best of this public body's knowledge, information, and belief, the public record does not exist under the address given by the requester, or by another name reasonably known to the public body.

Authority for denial: Public Act No. 442 of 1976, as amended, Section 3(1). Under section 10 of the FOIA, you may do either of the following:

- 1) Appeal this decision in writing to the Director of the Michigan Department of Environmental Quality at P.O. Box 30473, Lansing, Michigan 48909-7917. The writing must specifically state the word "appeal," and must identify the reason or reasons you believe the denial should be reversed. The head of the department, or his designee, must respond to your appeal within 10 business days after its receipt. Under unusual circumstances, the time for response to your appeal may be extended by 10 business days.
- 2) File an action in circuit court within 180 days after the date of the final determination to deny the request. If you prevail in such an action, the court is to award reasonable attorney fees, costs, and disbursements. Further, if the court finds the denial to be arbitrary and capricious, you may receive punitive damages in the amount of \$500.00.

If you have any questions regarding this letter, please contact Ms. Bessie Ingram at 586-753-3805.

Sincerely.

STATE OF MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY LANSING

August 13, 2009

Dan Gold 22725 Orchard Lake Rd Farmington, MI 48336

Dear Dan Gold:

This written notice is issued in response to your August 11, 2009, request for information under the Freedom of Information Act, 1976 PA 442, as amended (FOIA), Michigan Complied Laws 15.231 *et seq.* that was received by the Waste and Hazardous Materials Division office on August 11, 2009.

The purpose of the FOIA is to provide the public with access to existing, nonexempt public records of public bodies. Your request to examine or receive a copy of the following documents is denied.

Description of documents being denied: Northeast Corner Of Inkster & Northline Roads, 27227, 27211, 27101, 27001, 26975 Northline Rd, Taylor; 12900 Inkster, 27432 Northline Rd, Romulus, Mi

Reason for denial: To the best of this public body's knowledge, information, and belief the public record does not exist under the name given by the requester or by another name reasonably known to the public body.

Authority for denial: FOIA, Section 3(1). Under Section 10, you may do either of the following:

- 1. Appeal this decision in writing to the Director of the Michigan Department of Environmental Quality at P.O. Box 30473, Lansing, Michigan 48909-7917. The writing must specifically state the word "appeal," and must identify the reason, or reasons, you believe the denial should be reversed. The Director, or his designee, must respond to your appeal within 10 days after its receipt. Under unusual circumstances, the time for response to your appeal may be extended by 10 business days.
- File an action in circuit court within 180 days after the date of the final determination to deny
 the request. If you prevail in such an action, the court is to award reasonable attorney fees,
 costs, and disbursements. Further, if the court finds the denial to be arbitrary and
 capricious, you may receive punitive damages in the amount of \$500.00.

Sincerely,

Lee Petrovich, FOIA Liaison
